A. Patiño and H. Rago *Tutorial/Article didactique* On the constant of motion of dissipative systems 1

A. Iliadis and K. Siakavara Design and performance of a microstrip reflectarray on a uniaxial substrate 7

Zishan H. Khan, M. Zulfeqaur, Arvind Kumar, and M. Husain Electrical conductivity and thermo-electric power of a-$Se_{80-x}In_x$ and $Se_{80-x}Ge_{20}In_x$ thin films 19

Osama M. Abo-Seida Electromagnetic fields of thin circular loop antenna of arbitrary radius 29

A. Gashi, G. Rasche, and W.S. Woolcock The effect of vacuum polarization on muon–proton scattering at small energies and angles 39

Alexei M. Frolov, Vedene H. Smith Jr., and Garry T. Smith Deuterides of light elements: low-temperature thermonuclear burn-up and applications to thermonuclear fusion problems 43

A.A. Vasilyev, H. Tawara, P. Richard, and U.I. Safronova Observation and analysis (synthesis) of X-ray spectrum originated from electron capture of low-energy, highly charged Xe^{q+} (q = 26–43) ions in single collisions with Ar atom 65

Instructions to authors I-1

Recommandations aux auteurs R-1

February / février

A.R. Penner The physics of putting 83

Mark Burgess, M.E. Carrington, and Gabor Kunstatter Covariant approach to equilibration in effective field theories 97

Z. Abou-Moussa Compound multiplicity in the collisions of 4.1 A GeV/c ^{22}Ne nuclei with nuclear emulsion 109

N.N. Abd-Allah Nonstatistical fluctuations of target fragments emitted in high-energy nucleus–nucleus collisions 119

Shi-Hai Dong The SU(2) realization for the Morse potential and its coherent states 129

Mark R.A. Shegelski and Roman Holenstein Rapidly rotating sliding cylinders: Trajectories with large lateral displacements 141

Alexander I. Pegarkov Nonlinear excitation and ionization of diatomic molecules by short laser pulses. Model of two active electrons in the field of a frozen core 149

Shuai Wu, Ru-Juan Zhan, and Ji Chen *Research note/Note de recherche* Polarization dependence of optical harmonic generation from solid targets at high intensities: Role of Faraday rotation 173

F.P. Temme *Erratum*: Role of democratic $SU2 \times S_n$ dual-group carrier space and group structure in the superboson quantum-Liouville physics of identical spin ensembles: Maximal S_n tensor product reduction, via symbolic algebraic combinatorics 179

March / mars

Carl Krauthauser and Robert Nyden Hill Basis-set methods for the Dirac equation 181

U.D. Jentschura, H. Gies, S.R. Valluri, D.R. Lamm, and E.J. Weniger QED effective action revisited 267

N. Dammak, A. Kallel, Z. Fakhfakh, and D. Tréheux Dependence on crystallographic orientation of trapping properties in a polished MgO single crystal 285

Richard L. Liboff Solar neutrinos 291

A. Zehe, A. Ramírez, and J. Vázquez Dimorphism and perturbed growth kinetics of cadmium sulfide thin films in a chemical working solution 299

April / avril

Donal Murtagh, Urban Frisk, Frank Merino, Martin Ridal, Andreas Jonsson, Jacek Stegman, Georg Witt, Patrick Eriksson, Carlos Jiménez, Gerard Megie, Jerôme de la Noë, Philippe Ricaud, Philippe Baron, Juan Ramon Pardo, Alain Hauchcorne, Edward J. Llewellyn, Douglas A. Degenstein, Richard L. Gattinger, Nicholas D. Lloyd, Wayne F.J. Evans, Ian C. McDade, Craig S. Haley, Chris Sioris, Christian von Savigny, Brian H. Solheim, John C. McConnell, Kimberly Strong, E. Harvey Richardson, Gilbert W. Leppelmeier, Erkki Kyrölä, Harri Auvinen, and Liisa Oikarinen *Review/Synthèse* An overview of the Odin atmospheric mission 309

P. Eriksson, F. Merino, D. Murtagh, P. Baron, P. Ricaud, and J. de la Noë Studies for the Odin sub-millimetre radiometer: I. Radiative transfer and instrument simulation 321

Ph. Baron, Ph. Ricaud, J. de la Noë, J.E.P. Eriksson, F. Merino, M. Ridal, and D.P. Murtagh Studies for the Odin sub-millimetre radiometer. II. Retrieval methodology 341

F. Merino, D.P. Murtagh, M. Ridal, P. Eriksson, P. Baron, P. Ricaud, and J. de la Noë Studies for the Odin sub-millimetre radiometer: III. Performance simulations 357

C.A. McLinden, J.C. McConnell, E. Griffioen, and C.T. McElroy A vector radiative-transfer model for the Odin/OSIRIS project 375

Ian C. McDade, Kimberly Strong, Craig S. Haley, Jacek Stegman, Donal P. Murtagh, and E.J. Llewellyn A method for recovering stratospheric minor species densities from the Odin/OSIRIS scattered-sunlight measurements 395

K. Strong, B.M. Joseph, R. Dosanjh, I.C. McDade, C.A. McLinden, J.C. McConnell, J. Stegman, D.P. Murtagh, and E.J. Llewellyn Retrieval of vertical concentration profiles from OSIRIS UV–visible limb spectra 409

Craig S. Haley and Ian C. McDade Procedures for recovering mesospheric and stratospheric temperatures from OSIRIS scattered-sunlight measurements 435

J.R. Pardo, M. Ridal, D. Murtagh, and J. Cernicharo Microwave temperature and pressure measurements with the Odin satellite: I. Observational method 443

M. Ridal, D.P. Murtagh, F. Merino, J.R. Pardo, and L. Pagani Microwave temperature and pressure measurements with the Odin satellite: II. Retrieval method 455

C.A. McLinden, J.C. McConnell, K. Strong, I.C. McDade, R.L. Gattinger, R. King, B. Solheim, E.J. Llewellyn, and W.J.F. Evans The impact of the OSIRIS grating efficiency on radiance and trace-gas retrievals 469

C.E. Sioris, W.F.J. Evans, R.L. Gattinger, I.C. McDade, D.A. Degenstein, and E.J. Llewellyn Ground-based Ring-effect measurements with the OSIRIS development model 483

I.K. Khabibrakhmanov, D.A. Degenstein, and E.J. Llewellyn Mesospheric ozone: Determination from orbit with the OSIRIS instrument on Odin 493
